 - EU program was suspended in 2015

- Back-up personnel: Inspection and Certification Staff
- Language barrier for international projects
- Correct understanding of the regulation (derogations, paralel cropping)
- Investigation of irregularities

Change Old Fashioned System

Features interesting for ETKO

- Central availability of all customer data for all workers
- Management of Data changes through User Rights (?)

Administrator

Inspector

Certifier

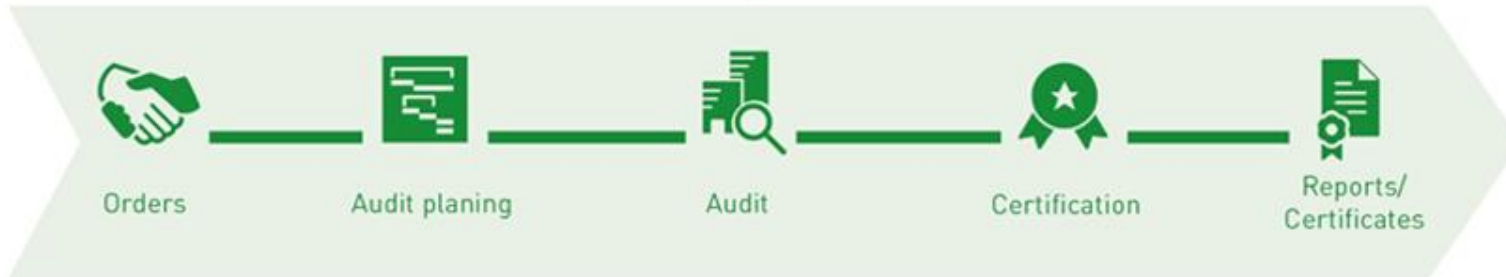

Administration

Inspection/Certification

- Transparent Workflow
- Onsite /Web Portal for Inspectors
- Controlling Inspectors Qualification

ETKO using Ecert Basic since 2016

Systematic approach on how to manage the entire certification workflow from application through inspection to the final certificate. Ecert Basic can be connected to Check Organic to provide data for further use in the supply chain

Check Organic approach to integrate data

- Check Organic allows import data from CBs in 3 options
 - Manual input using the Check Organic CB Portal
 - Excel upload
 - Webservice Interface
 - The webservice interface is used by ETKO to send data to Check Organic

The certification status is base for traffic light

The screenshot shows the 'Check Organic' supply chain monitor interface. The main navigation bar includes 'Main Menu', 'Supply chain monitor', and 'Organic Grain Import GmbH (OGI) | Supply chain details'. The user is logged in as 'ogi' under the 'ECERT' logo. The 'Supply chain list' is active, showing search filters for 'Name, No.', 'Country', 'Product', and 'Status'. Below the filters, the 'Suppliers' tab is selected, displaying a table of suppliers. The 'Status' column is highlighted with a blue box, showing traffic light icons: green for 'Certified', yellow for 'Not certified', and red for 'Not certified (with restrictions)'. The table includes columns for 'Supplier stage', 'EU CB No', 'Supplier', 'Address', 'Country', 'Status', 'Company details', and 'Add supplier to sub level'.
